

angelix

any help we can

warith 6:11 PM

Ok is there a chance ur company to fund me back if i prove its the company false ?

angelix 6:12 PM

i am not responsible to answer that, you have to ask in support and get an answer from the management

warith 6:12 PM

I am not sure if the bug was intentionally put there by ur team or it was a mistake the public will decide that

angelix 6:12 PM

i am here to help solving and finding the one responsible for this action

warith 6:12 PM

The support told me u are the cto

angelix 6:12 PM

that's correct

i am responsible for the technological part

warith 6:12 PM

So hook me to the manager i will talk to him

Write a message

angelix

that's correct

i am responsible for the technological part

warith 6:12 PM

So hook me to the manager i will talk to him

I need my funds back if u can't decide on that
let the person in charge talk to me

angelix 6:14 PM

i forward your message

in the mean time, if you believe that there is a
security hole in our software, why you are not
disclosing it to protect users?

warith 6:15 PM

Ok just tell them i am willing to help to fix the
issue only if i get assurance my funds will be
returned if i prove it was a mistake on ur wallets

I will disclose it on Tuesday on public why do u
want me to disclose it here if u can't answer me
if my money will be returned

Is it only about ur reputation what about my
life savings?

Since I messaged ur support nota single
message to show that u care about my money
all u want to know is where is the bug !

Write a message

angelix

Responsible for recovering yours funds are the local authorities. We try to identify how that happend

warith 6:22 PM

I will make sure everyone who lost in coinomi finds why and how they lost then u better have answers for them

I found many claims on google of people loosing assets the problem they don't know how it happened now i am telling u its in ur wallet i lost all my money because of that someone from ur management has to be held responsible then i will share it with u or i will have to share it on public and let authorities decide

Its ur call u guys decide before Tuesday i will be waiting and willing to help only if my money is assured to be returned

angelix 6:26 PM

All those people claiming that they had lost funds was by not storing the key securely

warith 6:27 PM

Yes this what I thought before checking ur code

Write a message

angelix

for what i say u guys have a terrible bug in ur wallets that is behind of assets lose

angelix 6:30 PM

How from a bug someone loses funds?

warith 6:30 PM

How do u loose ur money on atms bugs ?
Same answer applies

angelix 6:31 PM

You said that no-one hacked you, but from an application bug you lost funds

warith 6:32 PM

Yes

angelix 6:32 PM

Someone stole you, this person is responsible

warith 6:33 PM

Ic

angelix 6:34 PM

I am surprised that you are not trying to identify that person

warith 6:35 PM

You have his addresses did u identity him ?

Write a message

angelix

As I told before, you have to report the incident to your local authorities.

warith 6:37 PM

It will happen i wanted to make sure i talk to u guys first

Any ways

angelix 6:38 PM

It's not responsible if you withholding security informations :(

warith 6:38 PM

To make things simple and clear. Your app has a security bug that leads to passphrase being stolen. Now whether that was intentionally or not I can't decide. What I'm sure about is that the app has a serious bug and therefore you as a company behind the app take full responsibility for not taking proper security procedure.

I repeat my self I do understand the technical stuff and I know what I'm saying

I will wait for ur manager to contact me thx

Write a message

angelix

appreciate your time and effort to forward my messages to your management if they have the intention to take the responsibility once I share details.

I'm pretty sure any person with common sense will held you responsible.

Meanwhile I'm preparing full public disclosure and will send a copy to your support (hiding the details) and wait for you final decision.

angelix 6:54 PM

This is not very responsible, if there is a problem as you say, you are putting everyone's funds at risk. As a security researcher you know that this is not appropriate

warith 7:12 PM

I know my legal rights and you guys don't want to be held responsible i am sure in few days everyone will abandon your wallets its all up to you all what i am asking to is assurance to get my assets back if i prove u have a bug that leaks the passphrase and are refusing so let it go to public then u can reply to me in public then

Write a message

angelix

you all what i am asking to is assurance to get my assets back if i prove u have a bug that leaks the passphrase and are refusing so let it go to public then u can reply to me in public then

angelix 7:14 PM

https://en.m.wikipedia.org/wiki/Responsible_disclosure

warith 7:49 PM

I think you didn't understand me. No need to remind me about responsible disclosure. This bug can't be exploited by random people. It's meant to be exploited by the people who introduced it. So now think again of the responsibility.

In other words all passphrases belongs to a single entity that's how serious the issue is and yet you keep reminding me of the public disclosure. Please understand your responsibility first!

angelix 7:59 PM

We don't have any seed phrase of that is what you are implying. We use bitcoinj lib, have you contact them?

Write a message

angelix

We have a procedure to identify more important claims.

I the support has to follow the same procedure

warith 8:20 PM

I am not one of those users I know what I am talking about

angelix 8:21 PM

If what you are claiming is true for sure you are getting the bounty

But please follow procedure

warith 8:21 PM

Bounty ? What about my assets ?

Will the bounty be enough to cover my lose ?

angelix 8:22 PM

After all you can release it in public if you thing that we didnt cover you

warith 8:22 PM

So you are giving me the green light to go public with my findings ?

angelix 8:23 PM

No, I am saying start the procedure with the support guys

angelix is typing

angelix 8:23 PM

No, I am saying start the procedure with the support guys

warith 8:23 PM

Will the bounty be enough to cover my lose ?

angelix 8:23 PM

They do a kyc, and then make your request
Depends on the actual finding

warith 8:24 PM

Confirm that and i will do the kyc

angelix 8:24 PM

I dont know exactly

warith 8:25 PM

I need clear answer if my findings proves that ur wallet leaks passphrase will the bounty cover my lose ?

angelix is typing

Write a message

angelix

Confirm that and i will do the kyc

angelix 8:24 PM

I dont know exactly

warith 8:25 PM

I need clear answer if my findings proves that ur wallet leaks passphrase will the bounty cover my lose ?

angelix 8:26 PM

I don't think you have something to loose doing the kyc. It's not that doing the kyc we forbid you to release anythibg.

Is just to start the procedure

I am just the cto

warith 8:27 PM

Ok answer my question so i can do the kyc

angelix 8:28 PM

I don't want to lie to you. It's not my position in the company that

warith 8:28 PM

I am ready to do the kyc now with u just answer my question

angelix is typing

Write a message

angelix

my lose ?

angelix 8:26 PM

warith 8:28 PM

I am ready to do the kyc now with u just answer my question

angelix 8:29 PM

But I am sure that if the finding is super high severity the bounty will be fair enough

warith 8:29 PM

I appreciate your honesty but i need clear answer fair enough does not help type a number

angelix is typing

Write a message

angelix

Can I ask, why you are not making the kyc?

warith 8:31 PM

How about i send u the report i will publish 2 hours before i publish it will ur management look into it ?

angelix 8:31 PM

As a cto is fair enough for me

warith 8:31 PM

You guys look at it then decide to refund me or not

Ok let your management know about this and i will prepare the report

If my claim is right and that your wallet shared my passphrase then the issue is severe. Based on this severity will you guys cover my loss

Moreover I don't see a clear bounty program published that clearly states type of vulnerability and the bounty

Giving me \$10,000 wont cover my loss

Do we have a deal here

Therefore I'm not here for the bounty unless it covers my lose let me know if we have a deal here

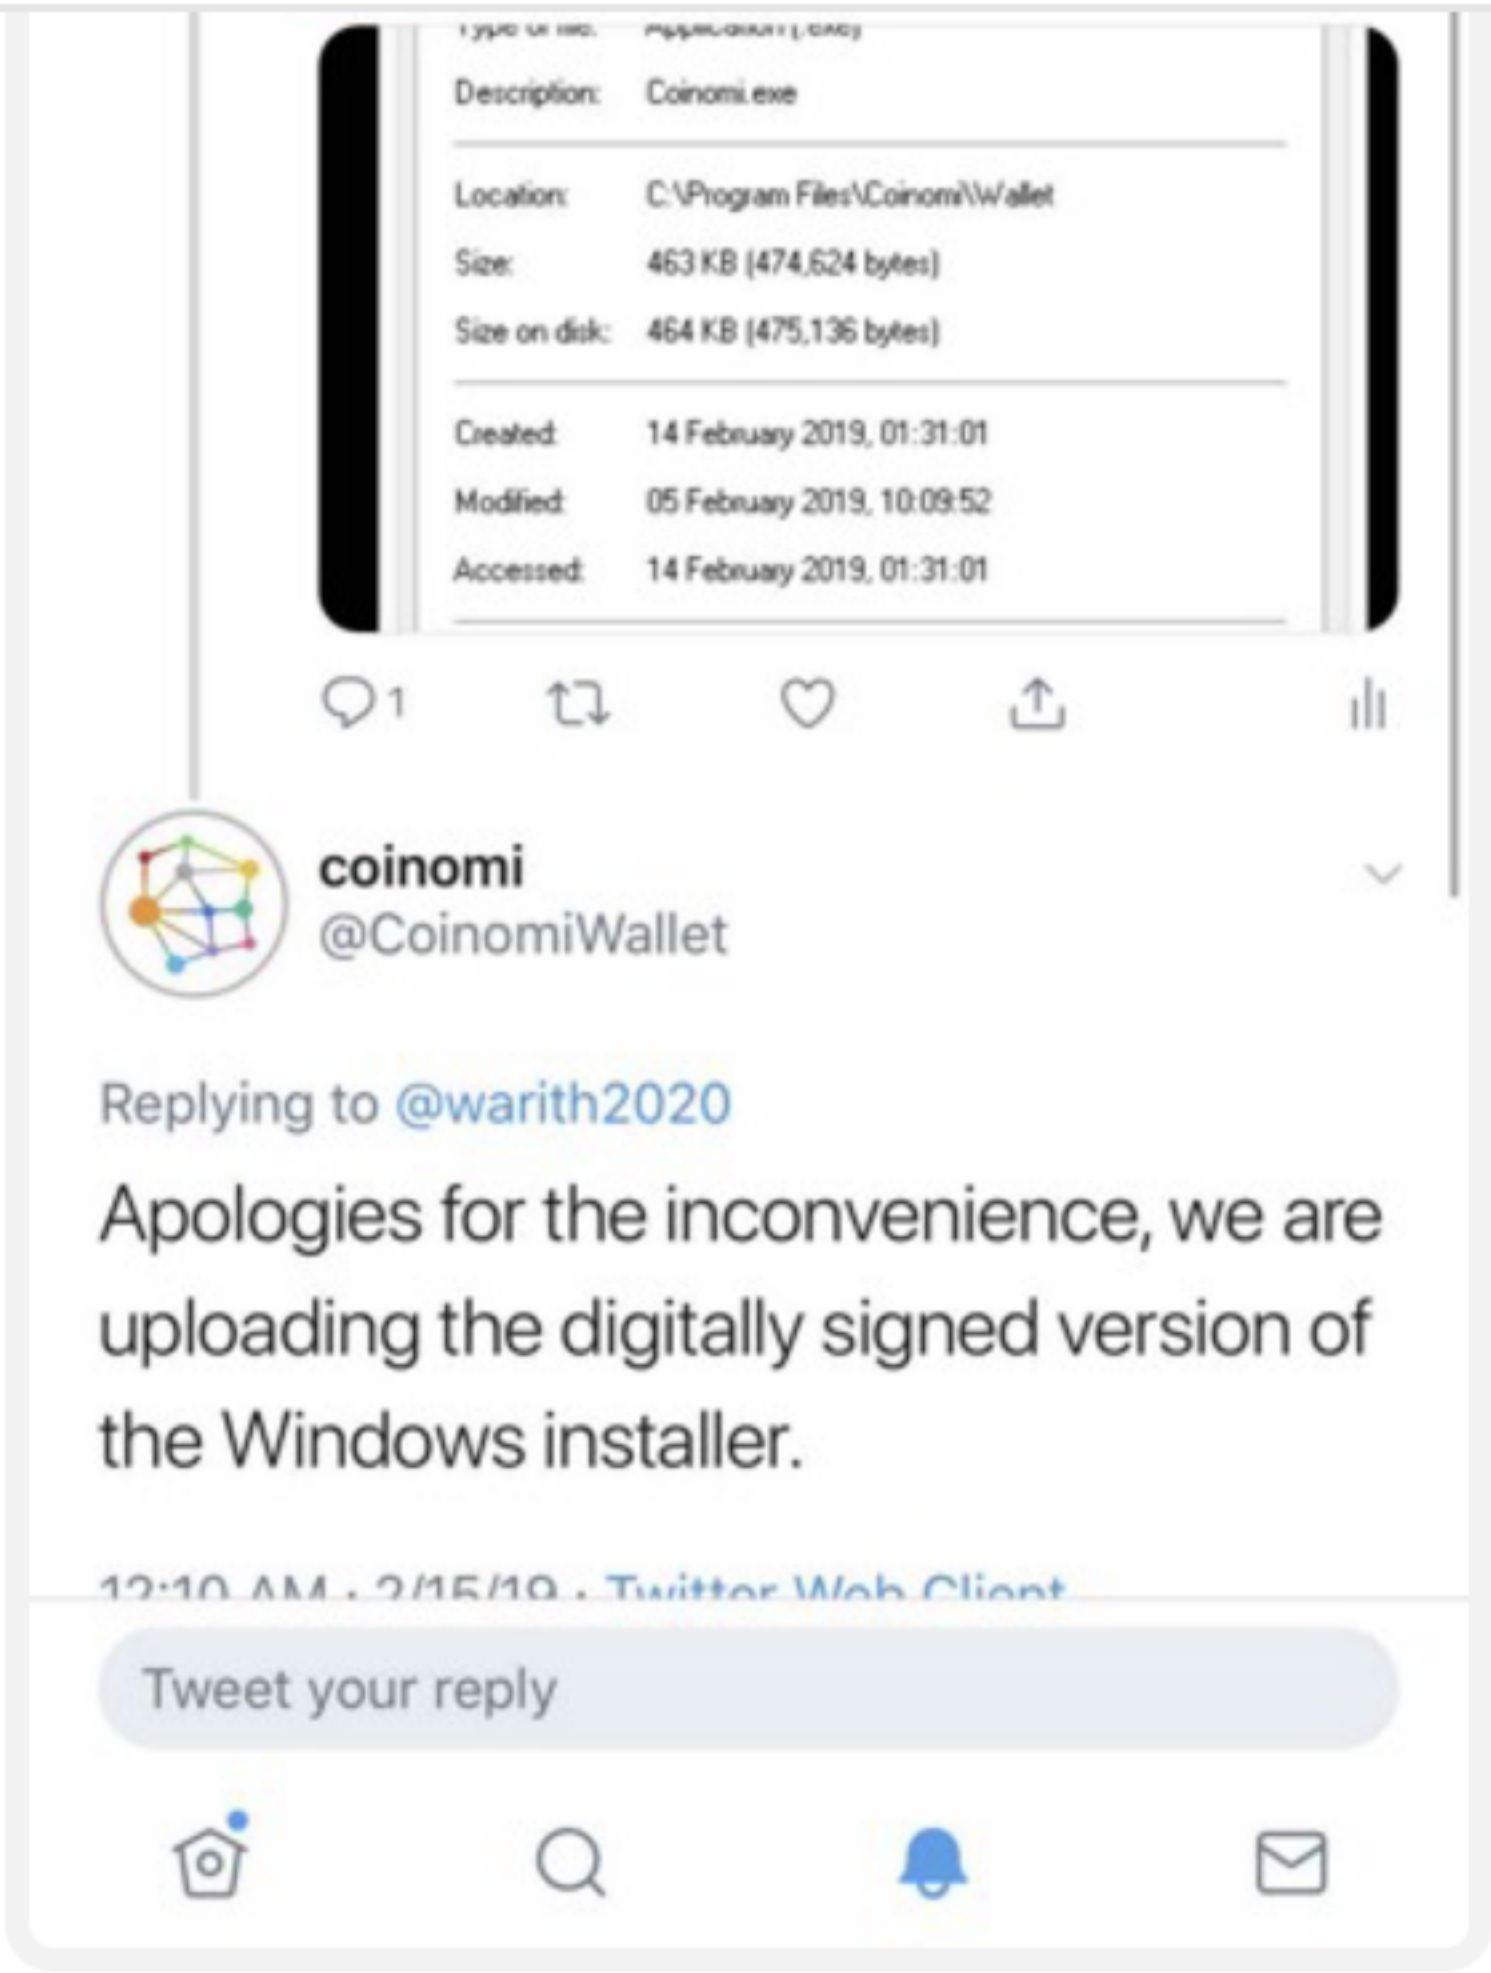

Write a message

personnel that clearly states type of vulnerability and the bounty

warith 8:40 PM

That was just running away from a fact

angelix 8:40 PM

If I can have some time with the report so that I investigate and talk to the management would be great

warith 8:40 PM

Ok i will give u time that is not an issue

Write a message

angelix

warith 10:24 PM

Report is ready

Are u here ?

angelix 10:46 PM

Give me 3 hours to get back to office

warith 10:48 PM

I will paste u the link here

Just a quick reminder as I am sending the report the only thing that will stop me from spreading this report is u guys refunding my lose in full if u highly appreciate the findings then u can consider the bounty but my concern is to get back my life savings back u have 12 hours from now to decide

angelix 10:48 PM

Ok. Appreciate this

3 hours past have you looked into the report?

angelix 3:44 AM

Just got it

angelix 5:58 AM

it seems there is an issue here with jxbrowser, i am forwarding the report so we can start communications about bounty and everything else, so please hold on the report. lets talk in the morning,

Since 2016 it was on 😊 check their website
Any how I am waiting for your reply

Write a message

angelix

not i am pretty sure authorities will make them triple what i am asking for now as my sole right for the lose because of ur wallet mess

Until this point u don't know how it effected ur users!!! dude u sent their passphrase in clear to third party now u are not sure how u affected them

angelix 11:03 AM

It's a complex issue, it was throught ssl
In a Google api
How someone was able to intervine?

warith 11:05 AM

Complex ? Send me ur crypto currency wallet passphrase via ssl now and i will show how simply I wipe the funds for u

angelix 11:06 AM

The data was encrypted when reached Google servers

warith 11:09 AM

My friend google servers gets it in clear text u better be serious now i am not here to give lessons about how ssl works i am here to get my stolen assets back
